

INDUSTRIAL

Real Solutions for Hard Working Environments.

Proven Industrial Products | 30 Years Experience

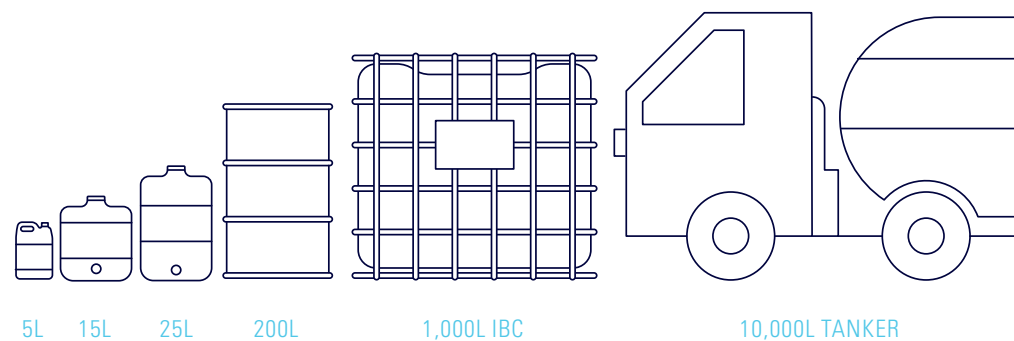

truebluechemicals.com.au

Delivering better solutions.

At True Blue, we are dedicated to working with our customers, supply partners and distributors to provide a full service package.

- 100% Australian owned and manufactured.
- Premium industrial cleaning and hygiene solutions for Mining, Manufacturing, Transport, Food Processing.
- Leading edge innovation.
- Built on core values of strong partnership.
- Industry Leading Compliance Solutions.
- Experience with customers of both scale and complexity.
- Trusted performance and passionate people.
- National capability and delivers Australia wide.

PRODUCT VOLUMES TO SUIT EVERY NEED.

Proven results – Suppress CP20.

Serious dust solutions for hard working environments.

Suppress CP20 contains crosslinked polymer technology that creates a film to hold down dust. Developed for use in above and below ground mine sites, on roads and graded tracks. Helps control airborne dust and reduces airborne dust hazards.

Airborne workplace hazards, such as dusts, can cause respiratory disease: asthma, asbestosis; chronic obstructive pulmonary disease and cancers of respiratory system.

POLYMER TECHNOLOGY

Highly effective performance.

TRIAL OVERVIEW

Suppress CP20 applied at QLD Mine Site.

OBJECTIVE

Reduce environmental impact.

Decrease need for reapplication of water using watercart.

Control dust at mine site compounds and access roads.

RESULTS

Highly effective performance after just one application.

Higher efficiency than water spraying alone.

Reduced labour and water usage.

Lower health risks, and negative environmental impact.

Results confirmed significant film creation, and improved dust control.

Recognised Standard of Coal Mining Safety and Health Act Regulations have prioritised QLD mine site trial.

Mines must ensure the safety and health management system contains adequate dust controls that provide effective protection to all coal mine workers and ensures the level of risk from airborne dust is kept at an acceptable level.

Mine sites must achieve effective management and control of airborne dust exposure.

RIANNA, HEAD OF INNOVATION, TRUE BLUE

Findings from World Health Organisation

Both reduced visibility when dust is in the atmosphere and the "slipping" hazard caused by deposited dust will increase the risk of workplace accidents.²

Environmental consequences of airborne dust include material build-up on buildings, machinery and equipment that may lead to degradation and increased cleaning and maintenance site costs and of surrounding communities.²

39%

of Australian workers were exposed to airborne hazards in the workplace

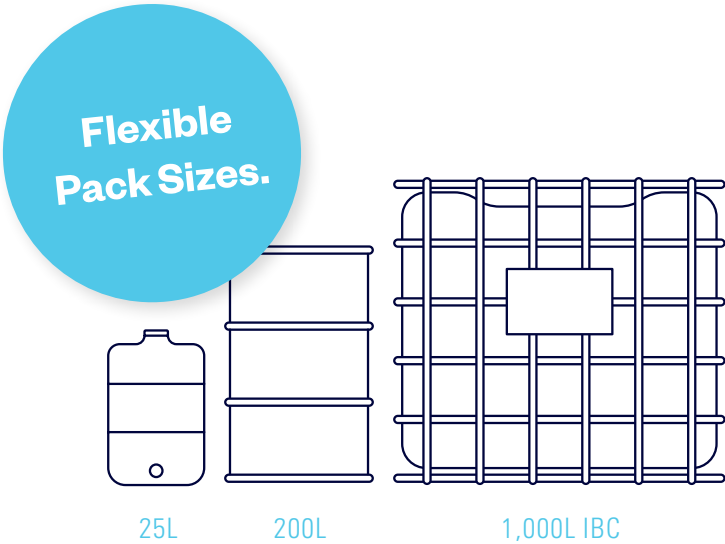

42%

of the exposed workers were exposed to low toxicity dusts such as sand and soil dusts.¹

Findings from 2010 National Hazard Exposure Worker Surveillance Study.

Reduce labour and water costs.

How to use.

1. Add Suppress CP20 to the water tank before application.
Industrial waste water can be used as a diluting agent.
2. Suppress CP20 is dispensed at a coverage rate of 1L per 1.5 – 2.5 m².

Application	Suppress CP20 Dilution
INITIAL	1:100
FOLLOW-UP	1:150
ONGOING	1:200

Strategic and cost benefits.

- Improved Workplace Health and Safety.
- Reduced labour and water usage.
- Better environmental conditions.
- Lower labour costs, resulting in reduced cleaning and machinery maintenance.

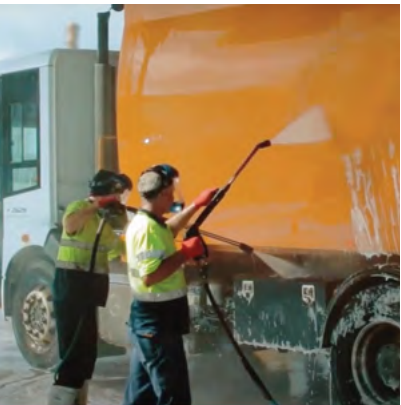

Flexible application option.

- Solar Powered Dosing Station with customised dosage.
- Easily programmed for Water Cart and remote control access.

High Performing Industrial Products.

We offer a comprehensive range of premium and economical industrial products.

Degreasing.

Ultimate Vehicle Wash

- Heavy duty with streak free finish.
- Ideal for trucks, cars, and all heavy duty machinery.

Touchdown

- Quick break degreaser and cleaner.
- Alkaline degreaser with added solvents.

Liquidate

- Heavy duty cleaner and quick break degreaser.
- High performing alkaline cleaner.

Janitorial.

Use All

- All purpose neutral cleaner.
- Effectively cuts through grime, and highly versatile.

Strike

- Removes grease and grime from hard surfaces.
- Suitable as spray on wipe off formula.

B & N Window Cleaner

- Non streaking glass, window and mirror cleaner.
- Dissolves dirt, film and oily stains.

King Hit

- Deodoriser and disinfectant.
- Exceeds TGA commercial grade disinfectant.

Washroom.

Blue Lazer

- Commercial strength disinfectant.
- Rapidly removes soap scum, lime, rust, and uric acid.

Cleankill

- Hospital Grade disinfectant and cleaner.
- Super chlorinated bleaching ability.

Hand Soaps

Pamper

- Hair and body shampoo.

Shift Gel

- Industrial strength hand cleaner with grit.

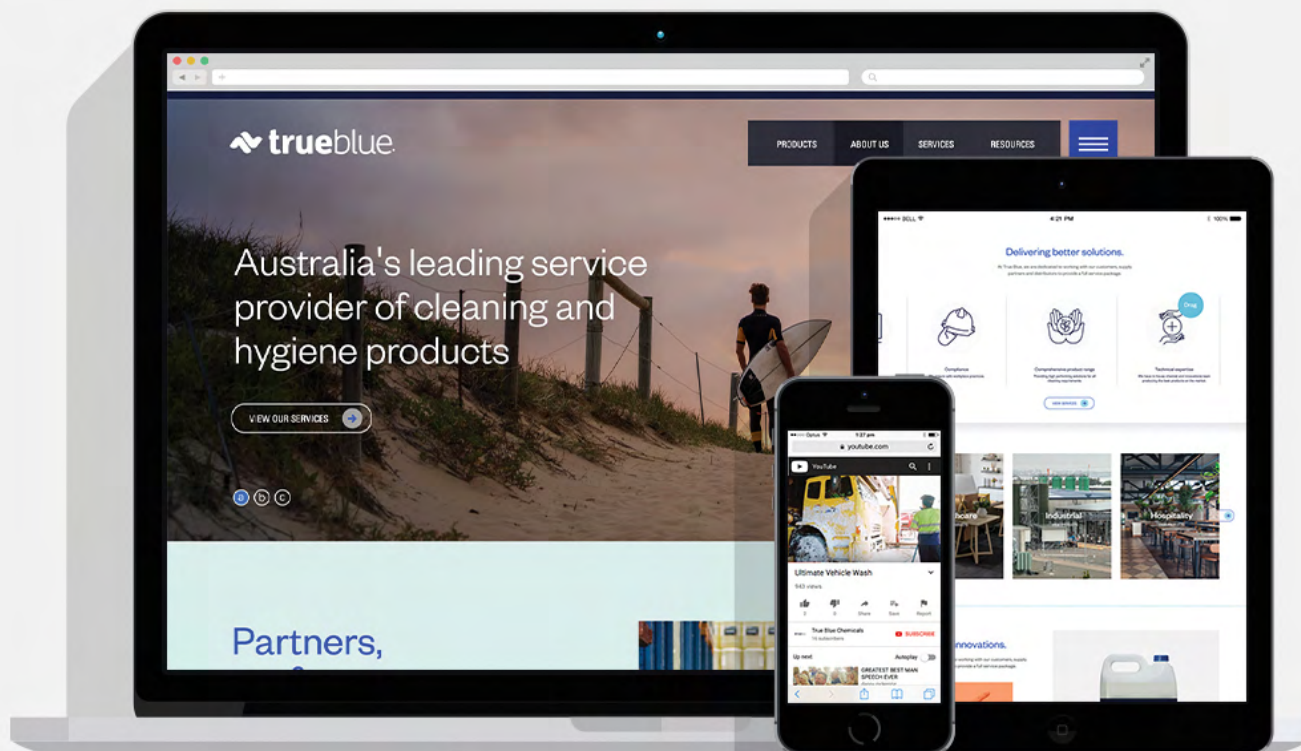

Verla

- Complete hand Care range with soap, gels and foam option.
