

WIPEOUT CONCENTRATION TEST

1. Dilute WIPEOUT according to the instructions on the label to create a Residual Sanitiser.
2. Tear off a 5 to 10 cm strip of HYDRION QT-10 Test Paper.
3. Dip the Test Paper into the WIPEOUT solution for 10 seconds.
4. Compare to the colour chart on the HYDRION package while the Test Paper is still wet.
5. The correct concentration for WIPEOUT is 200 ppm, in accordance with the guidelines of US FDA 21CFR178.1010 – Sanitizing Solutions.
