

## VEGISAN CONCENTRATION TEST

1. Dilute VEGISAN according to the instructions on the label.
2. Tear off a 5 to 10 cm strip of HYDRION Chlorine Test Paper.
3. Dip the Test Paper quickly into the VEGISAN solution.
4. Blot the Test Paper immediately with paper towel.
5. Compare to the colour chart on the HYDRION immediately.
6. The correct dilutions for VEGISAN is 100ppm in accordance with the guidelines of ANZFA.
